UNIVERSITY EDUCATION BY
COMPETENCIES

The University of the Future demands “Professors- Facilitators”

Today is necessary to assume a new Education paradigm, to be centered in the development and learning of Generic Competencies in the students.

It is essential to transform higher institutions classrooms into Learning Virtual Centers, with groups led by a professor that proposes experiences to achieve such a development.

Paper and pencil are already behind us, it is time of discussion forums after investigations; making good use of information technology tools and communication, in order to obtain the most advanced information in any topic. This is the first step in order to start building knowledge between all participants.

In the XXI Century the university level demands a new model of education, in order to convert the students in active participants. This require the preparation of a “professor-facilitator” and architect of learning experiences.

Marroco **ESC**® (by the Spanish acronym of University Education by Competencies) is a technological solution for the alignment of the three regular “professor-facilitators” regular classroom’s tasks: planning – teaching – assessment as per the new valid.

Technological Approach

Web-based developed software with a highly functional interface, designed with a flexible scheme that guarantees adaptation to the legal and administrative demands of each country.

The development process take place in a e-learning platform that have tow (2) technological solutions, that helps the users in the elaboration of the integrated planning and assessment of each topic. Also, this process includes the on-line development of teaching with the new focus also integrated with other tasks.

IT IS GOOD TO IMPROVE, BUT IT'S BETTER TO LEARN HOW TO CHANGE
